### **Abstract**

---

The invention relates to a toothbrush holder, especially for electrical toothbrushes, comprising a brush part 1 with a brush head 5 arranged on the end section and a brush holder with or without a connecting member for connection of a drive unit of an electrical toothbrush. The central axis 8 of the brush head 5 is arranged coaxially to the central axis 9 of the brush holder 1. The brush head 5 comprises a support plate 10 arranged transversely to the central axis 9 of the brush holder 1 on which bristles 6 are arranged at right angles to the support plane 11 of the support plate 10 (Fig. 1a).
